PRICE: 220.000 €

EXCITING CONSTRUCTION PLOT WITH BUILDING PERMISSION

We offer a construction plot with building permission in the southeast of Mallorca with views into the mediterranean nature and a with a beautiful stock of naturally grown trees.

The plot has a slight south-southwest slope and due to the slight tensions of the property, it forms itself ideal to the slight slope behind it. The property site is extensively flat and yet exciting because of the various curvatures. The property is easy to reach and well connected.

-You can not ask much more from a property-

You can either only purchase this beautiful piece of Mallorca with building permission or you can immediately order a realization of the new building for a fixed price and key-ready under the following link.
