MULTIFACETED FINCA, TOP MAINTAINED IN THE SOUTH OF THE ISLAND

A multifaceted Finca close to Ses Salines, which was designed with great love for detail. The beautifully landscaped garden with numerous Mediterranean plants, many different terraces and places to linger and relax, as well as many details in the outdoor area such as the fish pond and the fountain, not to mention the roof terrace that offers you a wide view and from where you can see the sea. All just some of the many features of this property. The property is located on a plot of approximately 17.000m².

The country house consists of a main house and an additional building, as well as a picturesque tower. In total there are 5 bedrooms, each unique in style, 5 bathrooms (one of them is found in the outside), 2 kitchens and 2 living rooms. Furthermore there is a double garage.

The complex is overall in very good condition and very well maintained and was last modernized / renovated in 2015. Are you interested in this unique property in the south of Mallorca? We would be happy to show it to you at a personal viewing.
