PRICE: 2.390.000 €

MODERN FINCA WITH SEAVIEW AT THE SOUTHEAST COAST OF MAJORCA

At the southeast coast, between Cala Llobards and Cala Santanyi, you can find this generous property.

This nature-stoned Finca was built in a modern style, in the southeast of Majorca, and offers peace and privacy by a pleasant way with seaview and a beautiful view over the surrounding.

The interesting mix of the natural stoned facade and the nature stone details in the inside of the house, as well as the spacious main area and the light flooded design, make the Finca to something special. The modern living room with nature stoned marfil-floor spends a warm atmosphere and underlines the line of the modern and natural integrated products.

Furthermore you can find a large kitchen in a modern style. All the versions are made of solid wood. The new construction project was processed with a high quality "finishing" which you can see and feel by entering the house. In the outside area you can find a pool, with an own poolhouse and an outside kitchen, with an additional large stone oven in the middle. We would be pleased to present this property at the southeast of Majorca to you, during a personal visit.
